EDUCATION

University of Central Florida, Orlando, FL — Bachelors in Computer Science (Accelerated B.S./M.S. Program)

AUGUST 2023 - MAY 2027

- Relevant Coursework
 - Data Structures and Algorithms, Object Oriented Programming, Processes for Object Oriented Software Development, Categorical Data Analysis, Algorithms for Machine Learning, Machine Learning, Artificial Intelligence
- GPA: 3.64
- Graduate-Level Focus: Machine Learning & Artificial Intelligence
- Pursuing a minor in Statistics

EXPERIENCE

Part-Time Software Developer, Orlando, FL — CodeNook

April 2024 - August 2024

- Developed the Generative AI Client Components in React.js allowing users to input their business specifics and tailor custom to themselves
- Leveraged AWS Cognito to create custom authentication and manage user data.
- Utilized the OpenAI API to allow users to interface with and develop generated social media content
- Leveraged AWS SNS via an AWS Lambda function that gave us the ability to let users know when their account has been credited on a monthly basis.
- Collaborated through GitHub and Agile development practices to deploy production features and resolve issues quickly.

LEADERSHIP & INVOLVEMENT

Girls Who Code — Mentor, Orlando, FL

August 2024 - Present

- **College Mentorship (September 2025 – Present):** Transitioned to mentoring first-year college students, focusing on strengthening foundational programming skills, academic support, and introducing best practices for collaborative coding and career readiness.
- **High School Mentorship (August 2024 – March 2025):** Guided high school students in learning coding fundamentals (Python, Java, and web development) and fostered early interest in technology by making coding approachable and fun.

PROJECTS

Cairos – Scheduling & Availability Platform

December 2025

- Developed a full-stack scheduling platform using React, TypeScript, Node.js, and Express that aggregates user availability and computes optimal meeting times using constraint-based scheduling logic.
- Designed and implemented RESTful APIs for availability processing, booking workflows, and conflict detection. Integrated the Google Calendar API for real-time synchronization and built secure email-based authentication using SendGrid.

Atticus – AI Legal Assistant

October 2025

- Designed a multi-stage LLM pipeline using Google Gemini to classify, summarize, and extract structured outputs from unstructured legal client data
- Implemented prompt engineering techniques to improve response consistency and reduce hallucinations
- Integrated authentication (AWS Cognito) and secure storage (Firebase Firestore)
- Built API layers in Node.js to manage model interactions and structured data flow

LANGUAGES

Python, C, Java, JavaScript,
HTML, CSS, SQL, Typescript, R

LIBRARIES

NumPy, Matplotlib, Pandas,
Scikit-learn

FRAMEWORKS

Node.js, React.js, Express.js,
Angular, Tailwind CSS

TOOLS

Visual Studio, Atom, Eclipse,
Figma, Jupyter Notebook,
MySQL, Twilio, Trello, GitHub

CLOUD

Amazon Web Services
Firebase

EVENTS

KnightHacks 2025

Lockheed Martin Code Quest
2022 Novice Division Orlando,
FL –Placed First

AWARDS

- UCF Dean’s List, Fall 2023, 2024, Spring 2025
- NCWIT Rising Star, 2023
- Florida Bright Futures Florida Academic Scholar, 2023
- UCF Provost Scholar, 2023
